Sub: Job application for the position of Sr. Systems Analyst

As I have been following your organization and work for multiple years, I was very pleased to discover your opening for the Senior Systems Analyst job which has been advertised on LinkedIn.com. I believe that I possess everything necessary to execute the role successfully. What is more, I am confident that I would become a valuable addition to your team.

To shortly introduce myself, I am a Senior Systems Analyst possessing 10+ years of quality experience in the field of Information Technology. Apart from being technically strong, I am also a certified Project Management Professional (PRINCE -2) & Certified Service Management Professional (ITIL-V4).

My decade long experience spans across two of the top employers namely Saudi Railways Organization and Infosys Technologies Limited. I have been working for more than nine years for Saudi Railways Organization progressing from Systems Analyst to Senior Systems Analyst. Before this, I worked as a Systems Analyst for another couple of years for one of the top Multi-national companies: Infosys Technologies Limited.

My core competence includes:
- Software development & support (SharePoint & J2EE)
- Business Intelligence & reporting (Power BI on DAX)
- Project Planning & Management (PRINCE -2 & PMI)
- Designing IT policies & procedures (ITILV4)
- Data Center Infrastructure Management (TOGAF)

Working as a Senior Systems Analyst, I am responsible for leading the team of software developers and administrators in the development of various software packages for Saudi Railways, and the Haramain High-Speed Rail. Furthermore, I also drive the implementation of any new features and enhancements of the Business Intelligence and reporting on Microsoft Power BI and fulfill the dashboard and reporting requirements of the railways to track the KPI's. Additionally, I act as a single point of contact for

SENIOR SYSTEMS ANALYST

managing vendor IT teams of network administrators, programmers, and analysts during project implementation and support periods. In addition to this, I work closely with the IT Director in establishing and implementing new IT rules and procedures by reviewing the Business continuity & disaster recovery plans and Information Technology Infrastructure Library (ITIL) regularly.

You may contact me anytime to discuss my profile in detail or maybe schedule an appointment for an interview, which would help me in expressing my skills and interest more effectively, also giving you a clearer idea of my knowledge and abilities.

Sincerely,
Azharuddin Mohammed
